```c
#include <stdio.h>

#include<ctype.h>

int main(void){

    // Here your code !

    char str[]="w3school.comsandeepkumar2016000@gmail.com";

    int chr=0;

    int index=-1;

    while(str[chr])

    {

        if(isalpha(str[chr]))

        {

            str[index]=str[chr];

            index++;

        }

        chr++;

    }

    str[index]='\0';

    printf("%s",str);

    return 0;

}
```
